The Driving Documents

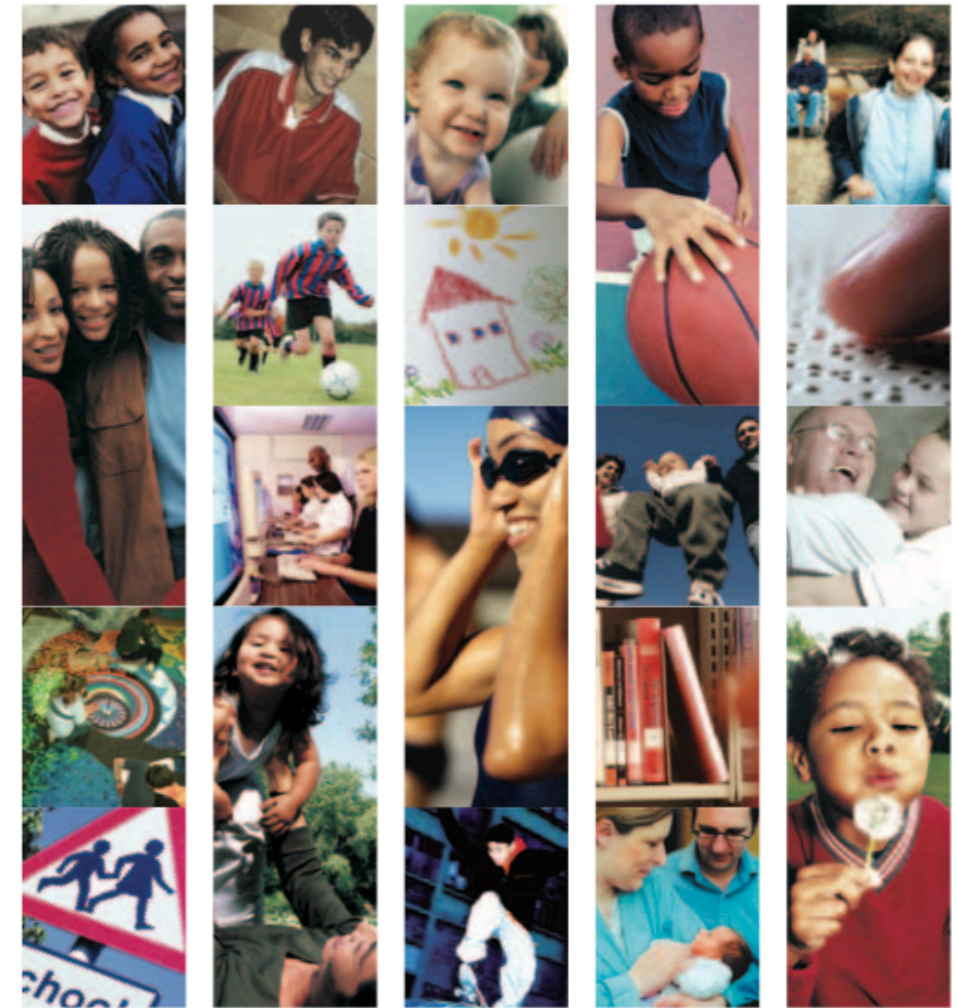

Harnessing Technology

Transforming Learning and Children's Services

department for
education and skills
creating opportunity, releasing potential, achieving excellence

education and skills
creating opportunity, releasing potential, achieving excellence

 HM Government

Every Child Matters:
Change for Children

change for children

The Objectives

**transform
teaching,
learning and
support**

**connect with
hard to reach
groups**

**improve
efficiency and
effectiveness**

**open up
education to
partnerships
with other
organisations**

The Milestones

2008

**Every pupil to
have a
personalised
online learning
space**

2010

**All schools to
have
integrated
learning and
management
systems**

Which allows

Anytime, anywhere learning

Broader educational opportunities

Lifetime ePortfolios

Parental involvement

Collaborative Working

Challenges & Barriers

Interoperability

Web hosting

Child Protection

Continuity of learning

Content Generation

So... what's this got to
do with us?

Ask yourself

What affect can terms of service have?

What does it mean if every child in school is writing web pages?

How long did it take us to learn this stuff?

Do web applications or sites already do this stuff?

What does this mean for the online community?

Where do teachers learn how to teach the web?

What could help

**If you know
how to do
something,
blog about it**

**Open source
example
stylesheets
or images**

**Link to good
examples,
tutorials**

**Think about
different
learning
styles**

**Know that schools will buy
expensive proprietary systems
over 'web standard' platforms
unless they are easier**
